

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A molding comprising polyacetal with wall thickness differences and with microcellular structure, where the mechanical properties and/or chemicals resistance of the molding is/are better than that/those of a corresponding solid moldings and wherein the microcellular structure has cells with a size in the range from 1 to 100 μm .
2. (Canceled)
3. (Previously Presented) The molding as claimed in claim 1, wherein the molding composition used to produce the molding comprises at least 40% by weight of polyacetals.
4. (Previously Presented) The molding as claimed in claim 1, wherein the density of the molding is in the range from 1.0 to 1.6 g/cm³.
5. (Previously Presented) The molding as claimed in claim 1, whose density is lower, by from 2 to 50%, than that of the molding composition used to produce the molding.
6. (Previously Presented) The molding as claimed in claim 1, which has an overtorque of at least 7.8 Nm.
7. (Previously Presented) The molding as claimed in claim 1, which has a screw-insertion torque of at least 2.5 Nm.
8. (Previously Presented) The molding as claimed in claim 1, which has no stress cracks within 10 minutes after 5 minutes of immersion into 50% strength sulfuric acid.
9. (Previously Presented) The molding as claimed in claim 1, wherein the polyacetal is a copolymer.

10. (Previously Presented) The molding as claimed in claim 1, wherein the molding encompasses metal.
11. (Previously Presented) The molding as claimed in claim 1, which has sharp corners, edges, ribs, fillets, screw domes, snap-action hooks, and/or film hinges.
12. (Previously Presented) The molding as claimed in claim 1, which has at least one perforation.
13. (Original) The molding as claimed in claim 12, wherein the area of the perforations, based on the total of the area of all of the perforations, is at least 1 mm².
14. (Previously Presented) The molding as claimed in claim 1, which has an average wall thickness in the range from 0.1 to 100 mm.
15. (Currently Amended) The molding as claimed in claim 1, wherein the difference between its minimum wall thickness and its maximum wall thickness is at least 1 mm, preferably at least 3 mm, and particularly preferably at least 5 mm.
16. (Canceled)
17. (Canceled)
18. (Canceled)
19. (Canceled)
20. (Canceled)
